TOP REASONS TO LOCATE IN MALAYSIA

11

SUCCESS STORIES

Malaysia, Your Asia-Pacific Aerospace Hub

A catalytic industry playing a major role

Strategically located at the heart of the wider Asia-Pacific region, Malaysia sits within the world's largest air travel market, and has world-class infrastructure. Together with its business-friendly Government, supportive industry policies, diversified manufacturing base, and widely available industry talent, the country is a cost-effective location for projects.

The Malaysian Government recognises the aerospace industry as a catalytic high-value industry under the 11th Malaysia Plan (11MP) and beyond. Malaysian Investment Development Authority (MIDA) emphasised the development of the aerospace industry, its supply chain, and its competency through industry-led research and technology (R&T) initiatives.

The Government has also put in place the Malaysian Aerospace Industry Blueprint 2030 (MAIB2030) to help drive the industry's growth. Underscoring the Asia-Pacific region's air travel market growth, The Boeing Company predicts that demand for planes will increase over the next decade, with the region requiring almost 17,485 planes. The region will also account for 39 per cent of global deliveries of passenger and freight planes over the same period.

With 40 per cent of aerospace industry growth coming from Asia-Pacific alone, and a collective GDP of four ASEAN countries exceeding US\$1 trillion by 2030, the future of the industry is in Asia.

Given the robust aerospace industry growth outlook for the Asia-Pacific region, opportunities abound in:

The manufacturing of parts and components

Establishing manufacturing/assembly bases for light aircraft and corporate planes

Aerospace supply chain activities such as engineering, electronics, composite materials, as well as manufacturing and systems integration

Aircraft/components maintenance, repair, and overhaul (MRO) activities

Aircraft conversion and modification activities

Strategically located in the heart of Southeast Asia, Malaysia's economic landscape with state-of-the-art and world-class infrastructure such as the KLIA Aeropolis, Subang Aerotech Park, Senai Aerospace Park, Serendah High Value Manufacturing Park Kulim Hi-Tech Park, Nusajaya Tech Park and Penang Technology Park@Bertam.

KLIA Aeropolis

Kulim Hi-Tech Park

UMW Aerospace Park

THE 2030 TARGET

The Malaysian Aerospace Industry Blueprint 2030 (MAIB2030) outlines a strategic path for Malaysia to emerge as the leading aerospace hub in Southeast Asia and an integral part of the global market. The blueprint targets a total revenue of RM55.2 billion and the creation of more than 32,000 high-income jobs.

Under the blueprint, MIDA plays a key role in promoting aerospace investments through incentives and matching grants. The organisation also serves to assist companies that intend to invest in the manufacturing and services sectors, as well as facilitates the implementation of the projects.

The Malaysian aerospace industry has grown significantly to emerge as the leading aerospace hub in Southeast Asia, providing more than 32,000 jobs opportunities mostly in the MRO and aero-manufacturing subsectors

MAIB outlines Malaysia's aerospace industry focus across five key areas, with R&T integral in supporting these areas:

MRO

To capture at least **5%** of global market share

Aero-Manufacturing

To be the **top** for aerospace parts and components sourcing hub by becoming a large sub-assembly, Tier-1, and Risk Sharing Partner

Systems integration

To become self-reliant (with at least **70%** local content) in the integration and upgrading of strategic assets

Engineering and design services

To capture at least **3.5%** of global market share

Education and training

To be the **No.1** supplier of industry talent within Southeast Asia

MIDA'S ROLES AND INITIATIVES

AEROSPACE MANUFACTURING

Aerospace manufacturing is one of the fastest-growing subsectors within the industry, covering both metallic and composite details and assemblies. In Malaysia, aerospace manufacturing has overtaken all other subsectors in the industry as the main contributor to total revenue. There are efforts underway to further develop local supply chains and vendors, particularly at Tier-2 and below, to meet growing demand.

Tier 1 set ups such as UMW Holdings Berhad's facility (which manufactures Rolls-Royce fan cases) catalyse lower-tier industry growth. The company's new aerospace hard metal manufacturing park provides an excellent platform to nurture this subsector. Leading aerostructure manufacturers operating in Malaysia include Spirit AeroSystems Malaysia Sdn. Bhd., Composites Technology Research Malaysia Sdn. Bhd., Aerospace Composites Malaysia Sdn. Bhd., SME Aerospace Sdn. Bhd., Upeca Aerotech Sdn. Bhd. (part of Senior plc), Singapore Aerospace Manufacturing (SAM), and Honeywell.

MRO

MRO is considered a mature subsector in Malaysia – companies within this space already serving major global industry such as Airbus SE, GKN Aerospace, GE Engine Services Malaysia Sdn. Bhd., Leonardo Helicopters, SR Technics Malaysia Sdn. Bhd., Hamilton Sundstrand Malaysia, ExecuJet Malaysia as well as local companies such as Airod Sdn. Bhd., Asia AeroTechnic Sdn. Bhd. and Sapura Technics Sdn. Bhd.

Malaysia aims to secure 50% of the Southeast Asian MRO business and 5% of the global market share by 2030. This ambitious goal is poised to establish the country as the premier aerospace hub in Southeast Asia. Notably, Subang Aerotech Park, renowned for its competitive cost advantages, stands as the largest MRO center within the nation, accommodating a diverse range of both local and global service providers.

AEROSPACE INDUSTRY INCENTIVES

INCOME TAX EXEMPTION

- Income tax exemption equivalent to pioneer status
 - Income tax exemption ranging from 70% to 100% for a period of 5 or 10 years
- Income tax exemption equivalent to investment tax allowance
 - 60% or 100% on qualifying capital expenditure for 5 years

REINVESTMENT ALLOWANCE

- 60% on qualifying capital expenditure for 15 consecutive years

IMPORT DUTY EXEMPTION

- For raw materials/components and machinery and equipment

TOP REASONS TO LOCATE IN MALAYSIA

Malaysia invites aerospace companies to soar new heights by establishing activities and operations within the nation's dynamic landscape. Besides its top-notch infrastructure (both generally and industry-specific), Malaysia is committed to positioning the aerospace industry as a key contributor to the manufacturing sector, in line with the nation's drive towards becoming a high-income economy based on innovation, creativity and high-value activities.

Malaysia is an emerging aerospace hub in Southeast Asia that is host to some of the major global aerospace companies. There is a complete ecosystem ranging from research and development, engineering and design, manufacturing, MRO, and human capital development. Malaysian companies are experienced with quickly adapting to evolving technologies and working in a borderless business world, which includes enabling OEMs to explore collaborations with any partner, from anywhere in the world.

Malaysia's business-friendly government has welcomed investors from across the globe over the decades, helps to ease the process of setting up operations. The Twelfth Malaysia Plan (12MP), – which runs from 2021 to 2025, continues to support the growth of the industry, as the Government pushes for Malaysia to be a global aerospace centre in the Asia-Pacific region. The industry, which has grown substantially in the past 20 years, is integral to the country's industrialisation and technological development programmes.

A crucial point to note is that Malaysia aims to be the preferred global aerospace outsourcing centre through participation in 'design and build' activities in aircraft programmes. In addition, the country aims to secure a greater share of the aero manufacturing and MRO markets as well as develop its capability in avionics and systems integration.

With MIDA at the forefront, Malaysia strives to become the preferred global aerospace outsourcing centre. Through strategic investment missions to targeted nations, collaborative industry linkage and supply chain programmes, Malaysia entices OEM and Tier 1 companies. This integration strengthens Malaysia's position in the global aerospace supply chain network.

SUCCESS STORIES

GKN AEROSPACE

GKN Aerospace Services Ltd is a Tier 1 supplier of airframe and engine structures, landing gear, electrical interconnection systems and transparencies.

The UK-based company has established its seventh Asian repair facility for aircraft engine components and its first engine systems business in the region at Nusajaya Techpark, located at the southern tip of the Peninsular Malaysia.

This facility, which requires 150 – 300 workers, specialises in servicing engines with low-pressure compressor (LPC) components, while its research will be centred on the application of additive manufacturing (3D-printing) technology into engine parts repair. The facility's location was identified with the help of the Malaysian Government and the MIDA and also serves as a state-of-the-art repair and research centre for customers in Asia-Pacific.

UMW AEROSPACE SDN. BHD.

Among local companies in the aerospace ecosystem, UMW Aerospace Sdn. Bhd., a wholly-owned company of the UMW Group, stands out for being the first Malaysian Tier 1 aerospace engine component manufacturer. UMW Aerospace's skilled workforce located in its plant in Serendah, Malaysia, produces fan cases, one of the largest and most complex parts of the engine to manufacture, for Rolls-Royce aero engines.

The Serendah plant complements the Rolls-Royce assembly plant in Singapore and rolled out its maiden fan case for Rolls-Royce Trent 1000 engines in November 2017. UMW Aerospace has a 25 + 5-year contract with Rolls-Royce Plc and the production of these fan cases will also have spill-over effects for the aerospace ecosystem as it will further develop the supply chain.
